EMPATHY MAP

Project Initialization and Planning Phase

Date	06 October 2026	**Maximum Marks**	4 Marks
Team ID	unm293200909	**Project Name**	FitBuddy – AI Fitness Plan Generator using Gemini Models
Name	Kavyasri.A	**Role / User Type**	Person seeking a personalized fitness plan

Empathy Map

Understand the FitBuddy user through four perspectives—Says, Thinks, Does, and Feels—when trying to get a suitable fitness routine.

SAYS	***THINKS***
• “I want a workout plan that matches my fitness goal.” • “I need a clear plan for each day of the week.” • “I would like useful nutrition and recovery tips.”	• “Will this plan suit my age, weight, and preferred intensity?” • “Can I update the plan if it does not fit my needs?” • “I need guidance that is easy to follow.”
PERSONA **NAME** FitBuddy User **ROLE / USER TYPE** A person seeking a personalized 7-day fitness plan	***DOES*** • Enters basic details such as age, weight, goal, and workout intensity. • Reviews the generated 7-day workout plan. • Gives feedback to request plan updates and reads nutrition/recovery tips.
FEELS	**WORK ASSIGNED — Kavyasri.A** 1. Identify the target user and their fitness-planning problem. 2. Document the user's needs under Says, Thinks, Does, and Feels. 3. Record the required user inputs and personalized 7-day plan expectations. 4. Include feedback-based plan updates and nutrition/recovery guidance in the empathy map.
• May feel uncertain about choosing an appropriate routine. • Wants to feel more confident about following a structured plan. • May feel encouraged when the plan reflects their goals and feedback.	

Based on the FitBuddy project description: personalized 7-day workout plans, user feedback for plan updates, and nutrition/recovery tips.
