TEAM INVOLVEMENT IN DEMONSTRATION

Team ID	unm293200909	Project Name	FitBuddy – AI Fitness Plan Generator using Gemini Models
Team Member Name	Kavyasri.A	Maximum Marks	1 Mark

Team Involvement in Demonstration:

This document records the active participation and role of the team member during the FitBuddy project demonstration. The responsibility is assigned according to the order of the given name and follows the project workflow documented in the uploaded FitBuddy project document.

S.No	Team Member Name	Role in Demo	Section Presented	Contribution Summary	Participation
1	Kavyasri.A	Project Presenter / Developer	Project introduction, Gemini model selection, architecture, core functionality, FastAPI backend, routes.py, frontend/Jinja2, deployment and testing	Explains the FitBuddy workflow, demonstrates personalized 7-day workout generation, nutrition/recovery tips, feedback-based plan updating, database storage, admin view, and overall application workflow.	Active

Assigned Work According to Project Order

Order	Work Assigned to Kavyasri.A
1	Research and select the appropriate Gemini model and define the FitBuddy application architecture.
2	Set up the development environment and required FastAPI, Gemini, Jinja2, SQLAlchemy and related libraries.
3	Develop core functionality: personalized 7-day workout generation, nutrition/recovery tip generation, feedback-based plan updating, and user/plan storage.
4	Implement FastAPI backend routing and process user input using routes.py and Pydantic validation.
5	Develop the main routes.py application logic connecting frontend, Gemini AI functions and SQLite database.
6	Design the responsive frontend and create dynamic Jinja2 templates: index.html, result.html and all_users.html.
7	Prepare the application for local deployment, configure environment variables, run Uvicorn and verify the application and API documentation.
8	Present the complete FitBuddy workflow during the demonstration and explain the major features and user interaction flow.

Team Coordination Notes

Aspect	Details
Team Leader / Coordinator	Kavyasri.A
Overall Team Coordination Rating (1-5)	5
Any issues during demo	No major issues reported.
How issues were resolved	The project workflow and demonstration sections were organized according to the FitBuddy milestones and responsibilities.

Source basis: The assigned sections follow the FitBuddy project workflow, which includes model selection and architecture, core functionality, FastAPI backend/routing, frontend development, and deployment. The FitBuddy document describes Gemini Pro for workout generation/updates and Gemini Flash for nutrition tips.
